

Singapore's Intended Nationally Determined Contribution

2005

**36% reduction in Emissions Intensity;
Stabilise emissions with the
aim to peak around 2030**

2030

Examples of New/Enhanced Sectoral Measures

Power Generation

Adopt more efficient technologies

Facilitate greater deployment of solar PV

Buildings

Raise energy efficiency standards

Support on-site generation of solar energy

Households

Raise energy efficiency of household appliances

Promote energy-saving behaviour

Industry

Improve energy efficiency

Provide incentives

Strengthen regulations

Transport

Increase public transport mode share

Encourage walking and cycling
