

CLIMATE CHANGE 101

What is climate change?

Changes in weather patterns **OVER** a long period of time

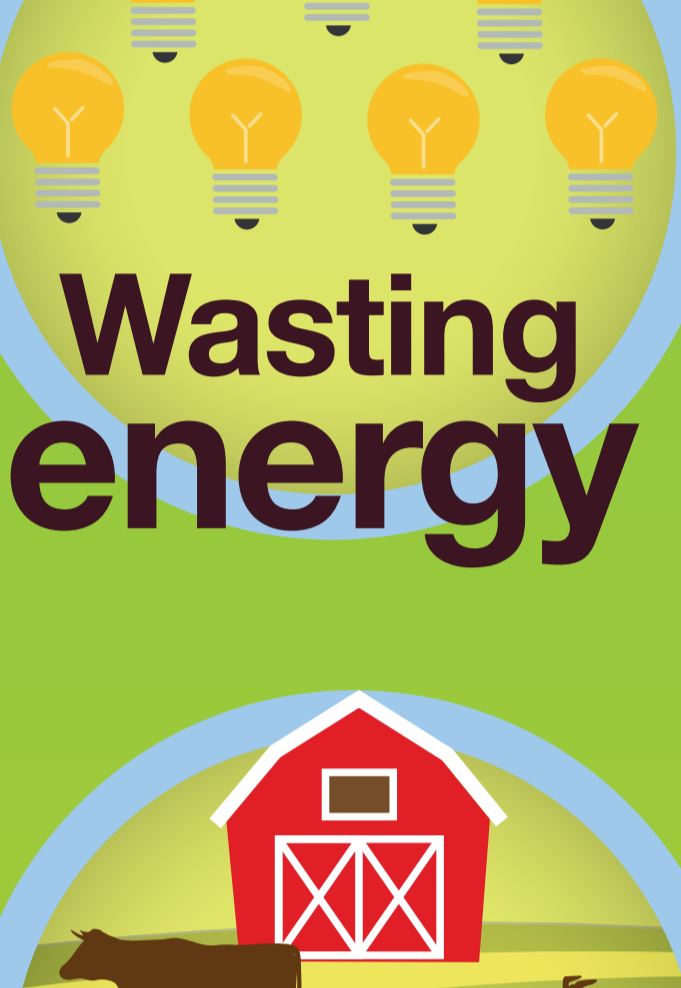

Climate change is happening and...

We are **95%** sure that human activities are the main cause*

How are we contributing?

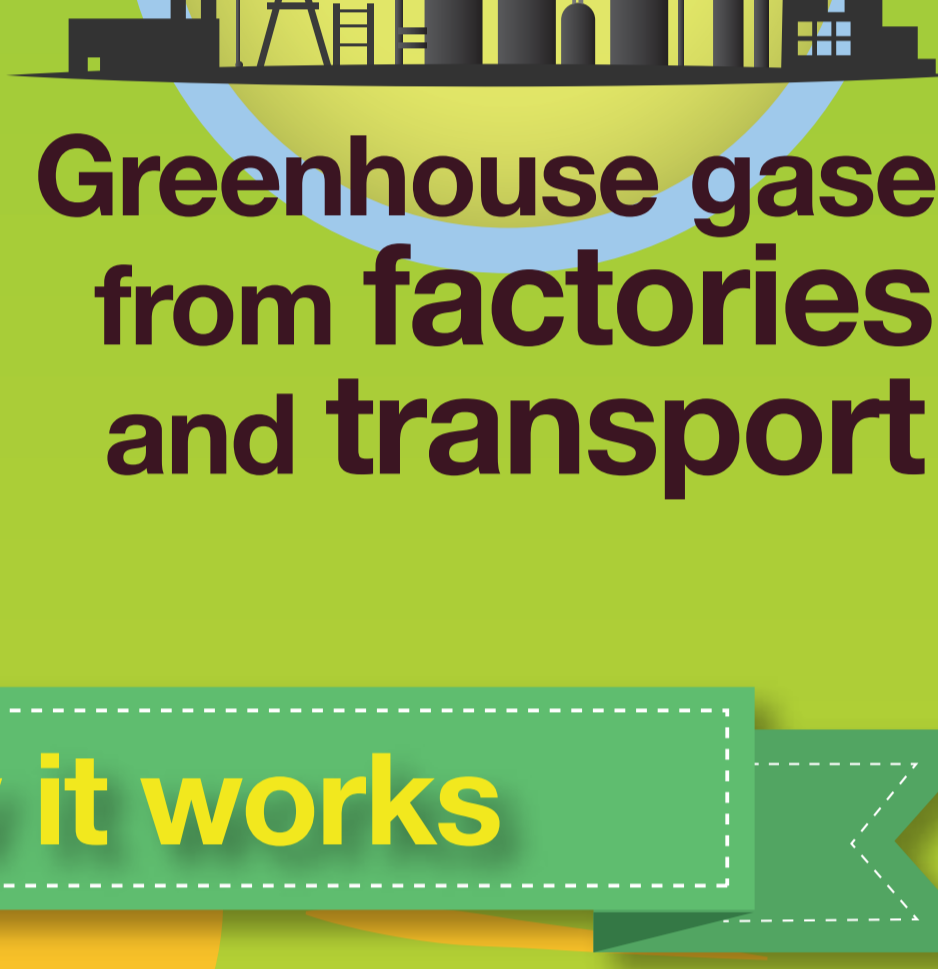

Wasting energy

Cutting down forests

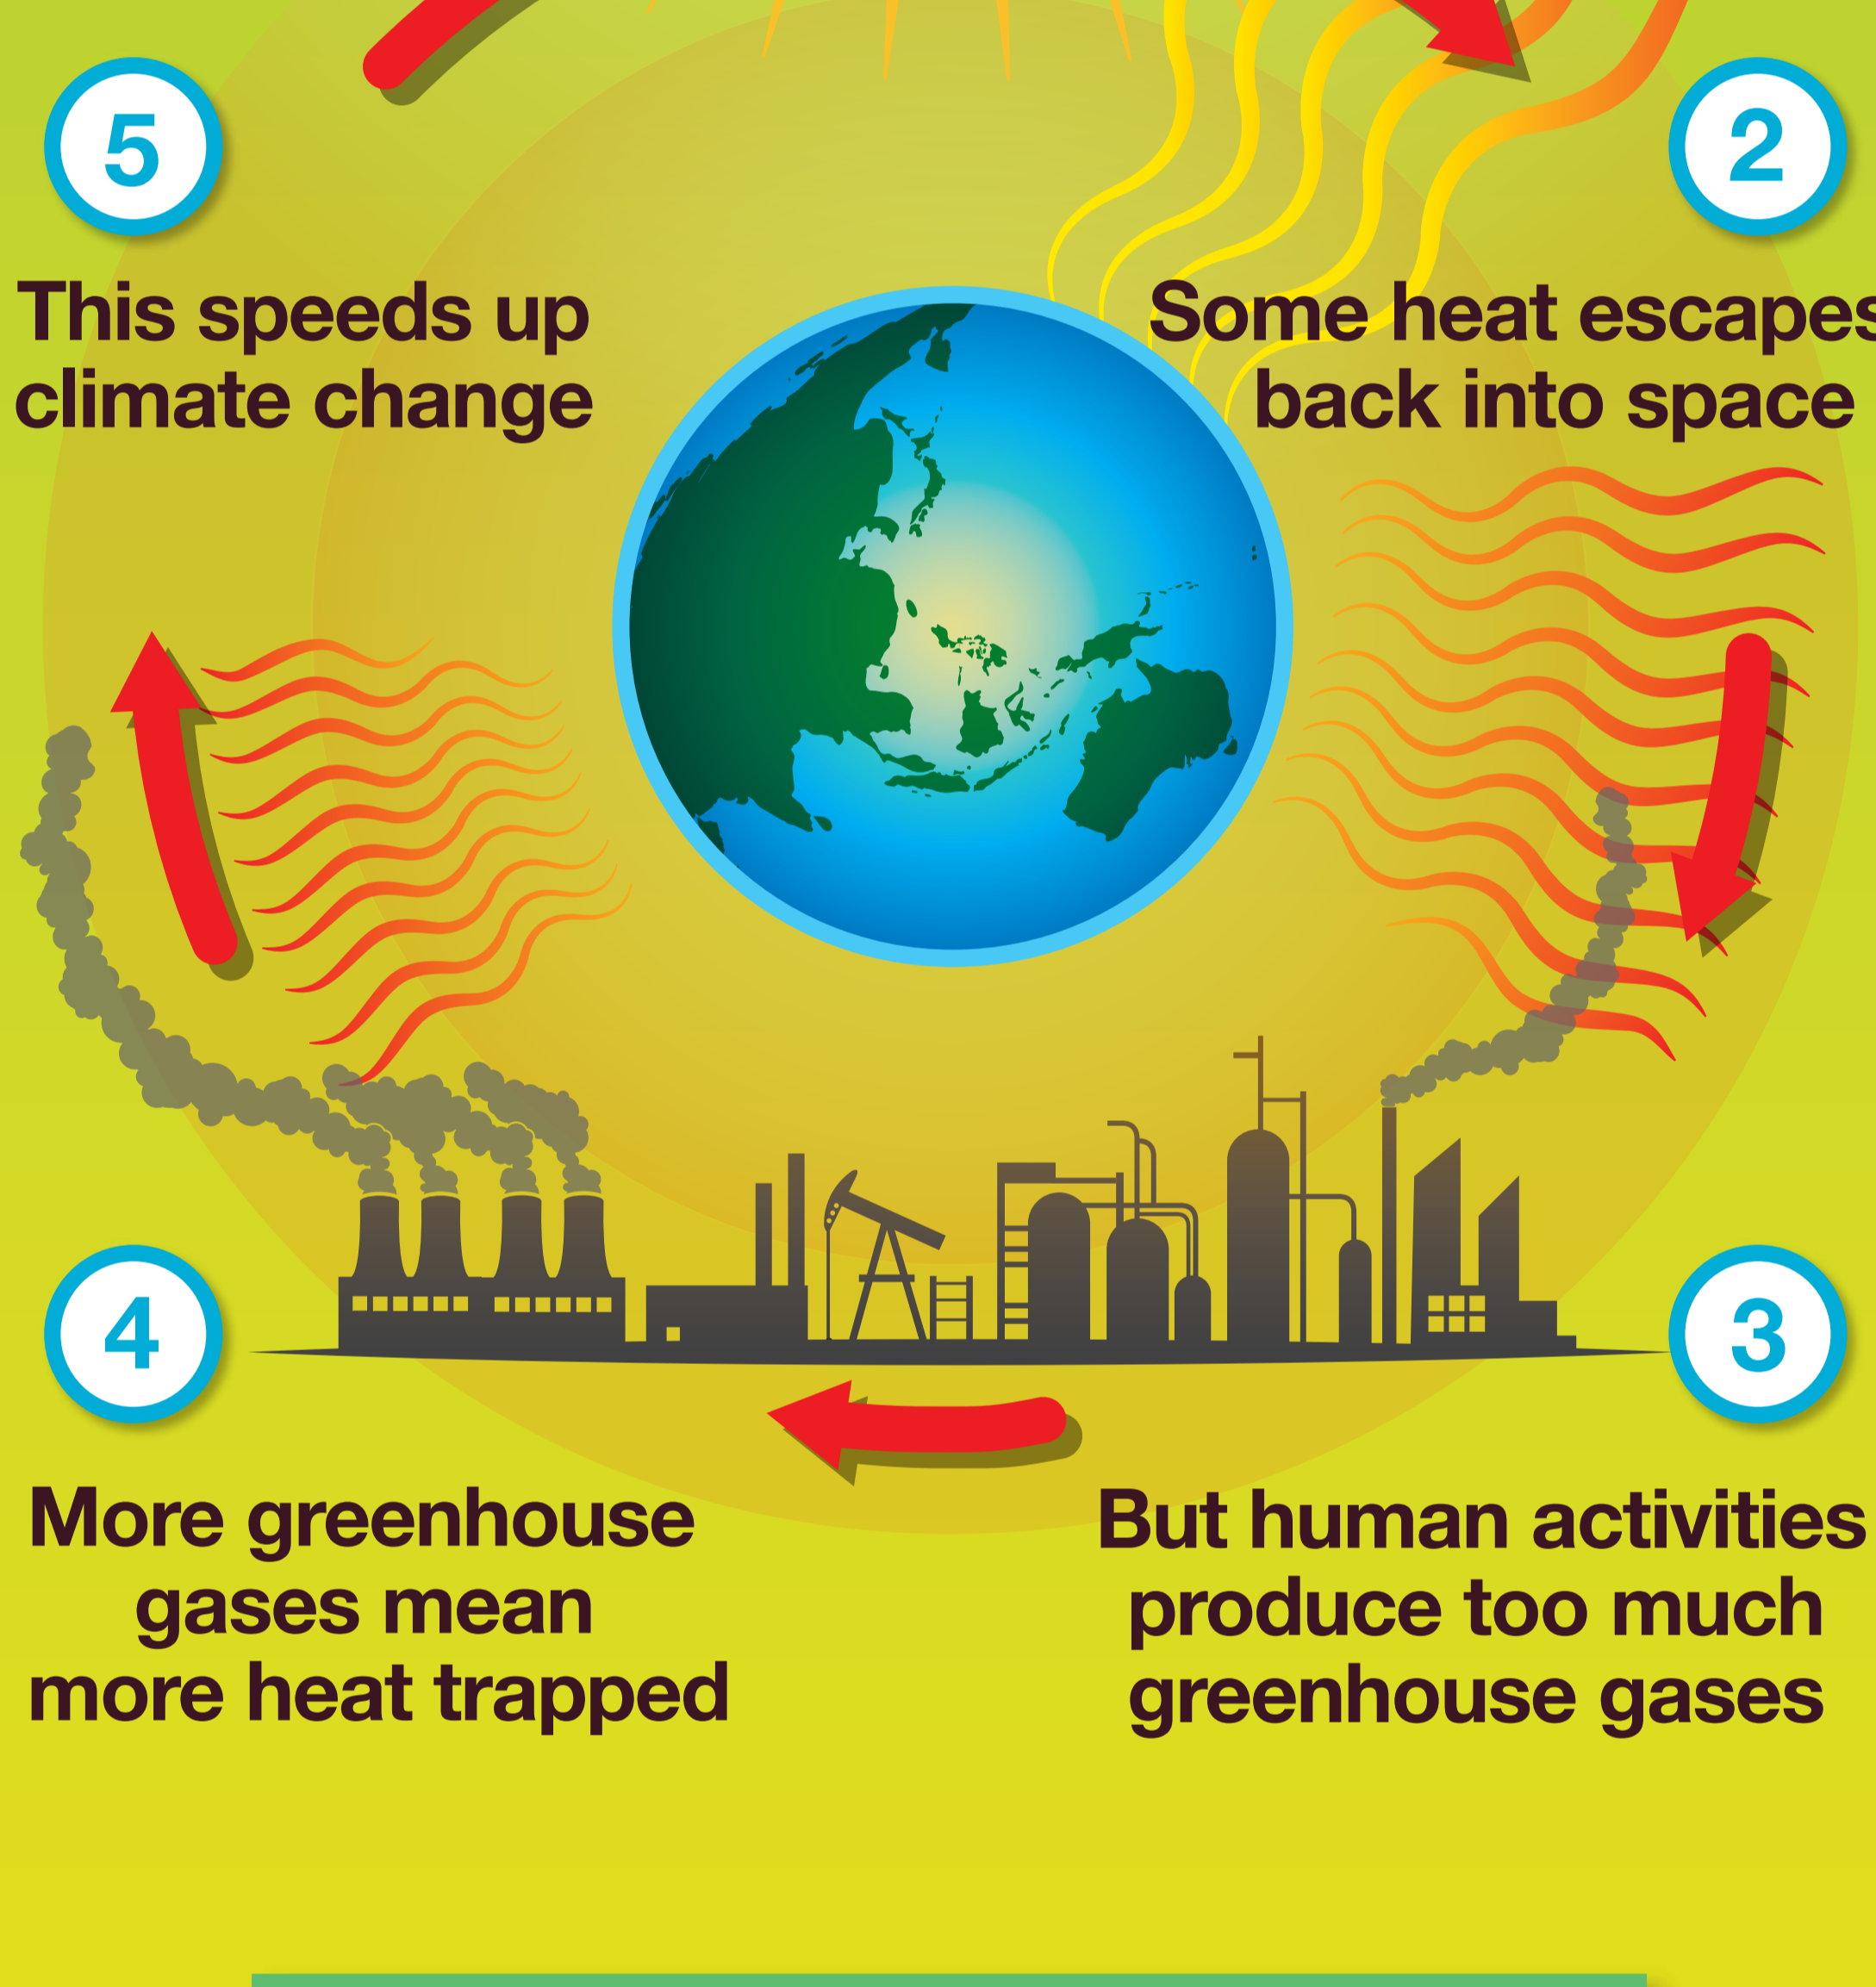

Greenhouse gases from farming

Greenhouse gases from factories and transport

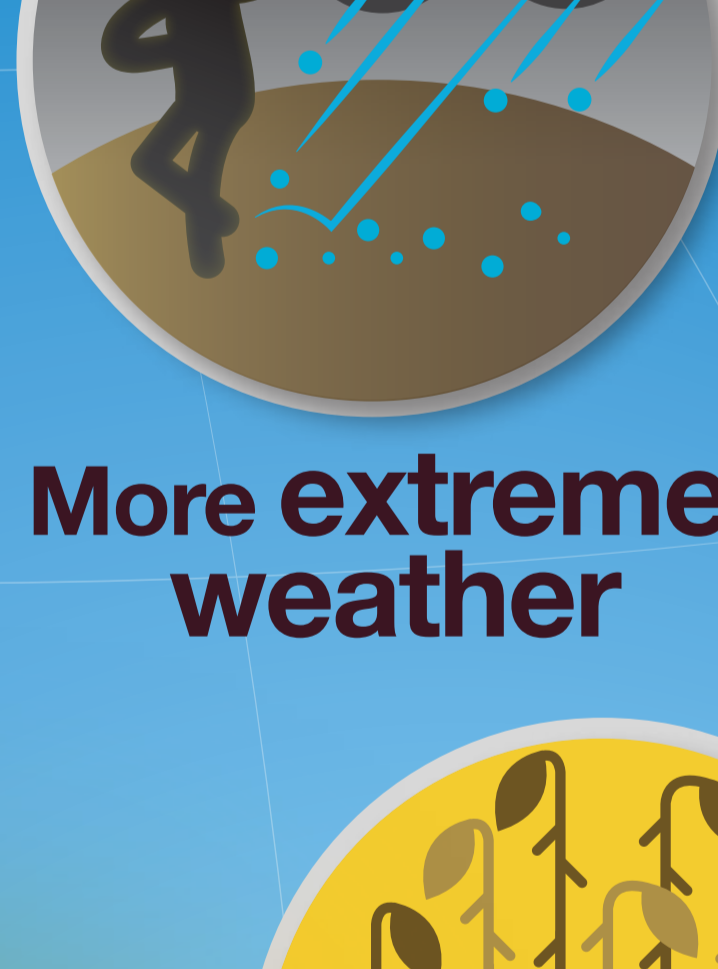

This is how it works

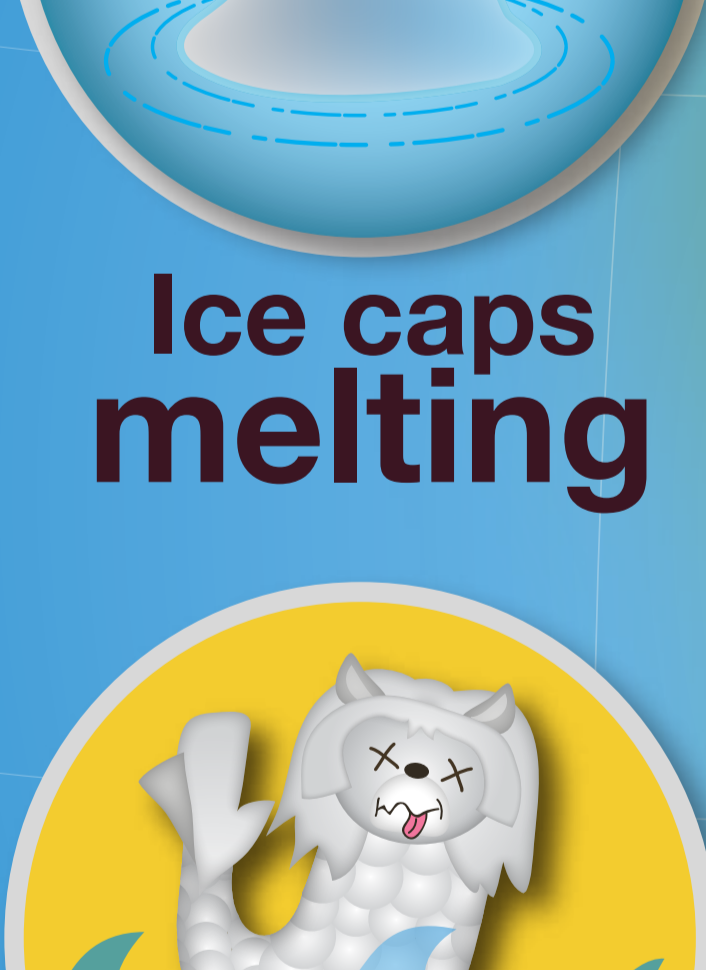

How does it affect me?

Rising temperatures

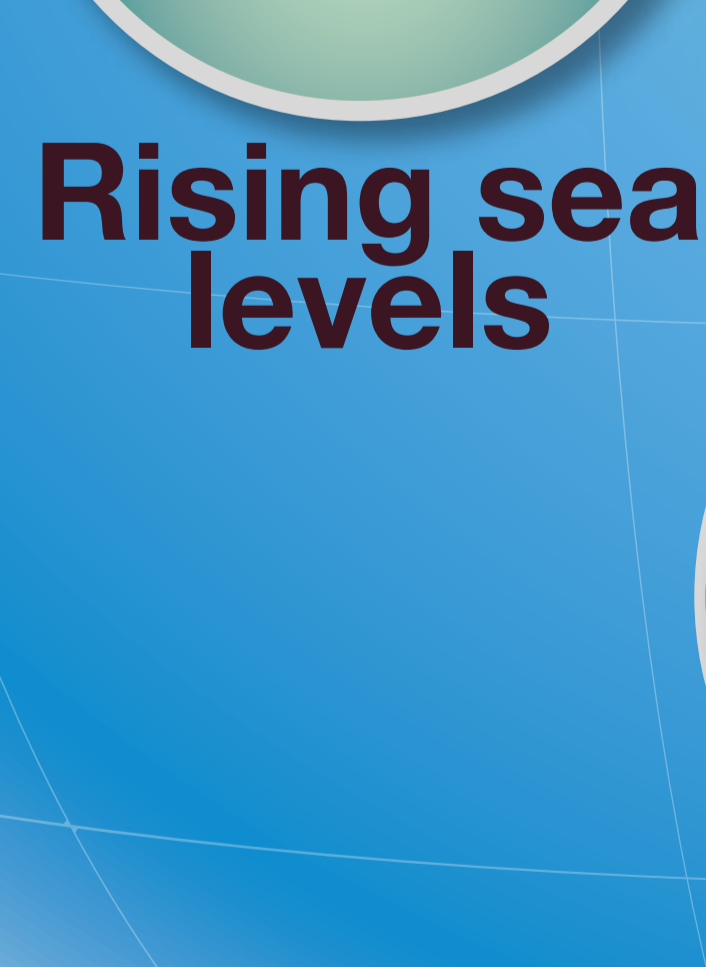

More extreme weather

Ice caps melting

Droughts and crop failures

Rising sea levels

Favourite food more expensive

Extinction of some species

Possible health problems

Some diseases thrive and spread

Heat stroke and dehydration

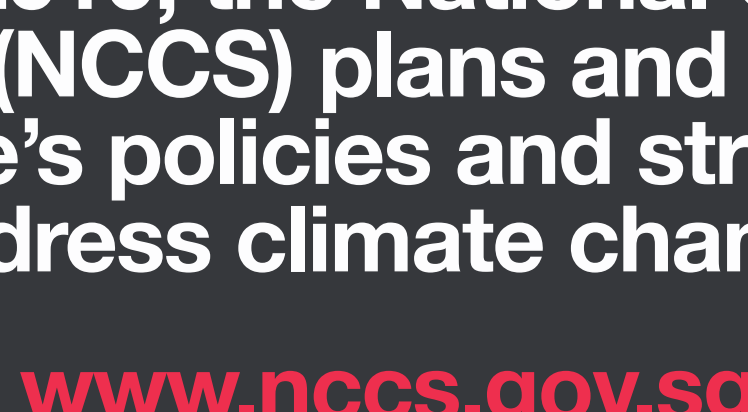

What will you do about it?

Helping Singapore change with the climate.

Established in 2010, the National Climate Change Secretariat (NCCS) plans and coordinates Singapore's policies and strategies to address climate change.
